

HOW TO PLAN TO RECYCLE AT YOUR NEXT EVENT

Even if you're already recycling at your place of business, you may find unique challenges when recycling for an event, festival, fair or even remodeling or construction sites.

So if you'd like to recycle at your next event, here are three steps to get started.

1. PLAN AHEAD

- Reach out to Kimble Recycling & Disposal during the early stages of planning to reserve the right number of containers for your event.
- Divide your event area into zones, and staff each zone to keep your recycling efforts running smoothly throughout the event.

2. COMMUNICATE

Communicate with vendors and volunteers, attendees, or on-site staff and contractors that:

- Recycling is provided
- Where containers will be located, and
- Which items can be recycled

3. CLEAN UP

Clean up with Kimble is easy! Simply leave your containers in the designated area (no need to sort your items!), and Kimble will pick them up for you.

Questions? Contact one of our representatives and we will work with you to create [a custom plan for your next event.](#)
